

ASC CCV 30M74R

miscellaneous

Quality used Coil Car and Rails to suit a variety of Cupper and Shell Press feed applications. Efficiently transfer and load coils as part of an integrated coil-handling system. Rotating models are available with an independent rotating platen that allows the operator to ensure the coil wrap direction is properly oriented on the mandrel, and are predominately used in dual-uncoiler systems. OEM is ASC Machine Tools, Inc.

Technical specifications

CazProductNumber CPN	5566
Name	ASC CCV 30M74R
Year of Construction	1980
